# Welcome

At ServiceTitan, we value our developers and strive to provide the best developer experience. With this in mind, we aim to get you onboarded quickly, offer resources to reduce your development costs and speed your time to market, unlocking value quickly for your business.

The ServiceTitan developer portal is where you can discover ServiceTitan APIs, learn how to use them, test them, and manage your application keys.

**Supported users:** Our infrastructure is designed to serve these organization types:

- ServiceTitan Customers (a.k.a Tenants)
  - Businesses that have at least one ServiceTitan account and leverage the ServiceTitan suite for running all or some functions of their business. We assume these customers build private applications leveraging ServiceTitan APIs which is used within the organization. They have their own software engineering resources to successfully complete API integrations.
- Developers
  - Integration developers build integrations to ServiceTitan APIs, increasing the breadth of the ServiceTitan platform and feature set.
  - App developers build public apps and want to market their apps to ServiceTitan's customers. We recommend these developers to establish a relationship with ServiceTitan before integrating to ServiceTitan APIs by filling the form requesting access.
