**GET** {tenant}/technicians/{technician}/payroll-settings

### TimesheetCodes

**GET** {tenant}/timesheet-codes

**GET** {tenant}/timesheet-codes/{id}

### Timesheets

**GET** {tenant}/jobs/timesheets

**GET** {tenant}/jobs/{job}/timesheets

**GET** {tenant}/non-job-timesheets

# Payroll

API definition 

## Export\_ActivityCodes

Provides export feed for activity codes

### Request

#### Production Environment

**GET**

`https://api.servicetitan.io/payroll/v2/tenant/{tenant}/export/activity-codes[?from][&includeRecentChanges]`

#### Integration Environment

**GET**

`https://api-integration.servicetitan.io/payroll/v2/tenant/{tenant}/export/activity-codes[?from][&includeRecentChanges]`

### Request parameters

Name	In	Required	Type	Descrip
tenant	template	true	integer	Tenant I
from	query	false	string	Continu request specified beginning Use cust the expc
includeRecentChanges	query	false	boolean	Use "tru changes results a request:

Response: 200 OK

The request has succeeded

application/json

## ExportResponse\_Of\_Payroll.V2.PayrollActivityCodes....

Represents export API response.

Name	Required	Type	Description
hasMore	true	boolean	Indicates whether the export has reached its limit. If true, there is more data to export. If false, the export is complete. If true, means the controller will return another request for a new continuation token. If false, means there is no more data in the export, and the user should wait for a specified time (in minutes) before making another request.
continueFrom	true	string	Continuation token from the previous export operation. This should be used as the 'continueFrom' parameter of the next request.
data	true	<a href="#">Payroll.V2.PayrollActivityCodes</a>	The collection of payroll activity codes. Usually sorted by code.

### default

DEFAULT - JSON

Copy

```
{
  "hasMore": true,
  "continueFrom": "string",
  "data": [{
    "id": 0,
    "name": "string",
    "code": "string",
    "earningCategory": {}
  }]
```

```
        "createdOn": "string",
        "modifiedOn": "string",
        "active": true
    }
}
```

## Response: 400 Bad Request

The request cannot be processed, check validation errors or request format

application/json

### ApiErrorResponse

Detailed error response, following RFC 7807 recommendations (<https://tools.ietf.org/html/rfc7807>).

Name	Required	Type	Description
type	true	string	A URI reference problem type
title	true	string	A short, human-readable title of the problem
status	true	integer (int32)	The HTTP status code
traceId	true	string	Internal trace identifier for diagnostics
errors	true	object	Provides more details about the error(s) that occurred, which can be used for visual representation
data	true	object	Provides additional context or data for the error, which can be used for programmatic processing

default

DEFAULT - JSON

 Copy

```
{
  "type": "string",
  "title": "string",
  "status": 0,
  "traceId": "string",
  "errors": {},
  "data": {}
}
```

## Definitions

Name	Description
<a href="#">ApiResponse</a>	Detailed error response, following RFC 7807 recommendations ( <a href="https://tools.ietf.org/html/rfc7807">https://tools.ietf.org/html/rfc7807</a> ).
<a href="#">ExportResponse_Of_Pa...</a>	Represents export API response.
<a href="#">Payroll.V2.PayrollActivit...</a>	
<a href="#">Payroll.V2.PayrollEarni...</a>	

## ApiResponse

Detailed error response, following RFC 7807 recommendations (<https://tools.ietf.org/html/rfc7807>).

Name	Required	Type	Description
type	true	string	A URI reference the problem type
title	true	string	A short, human-readable description of the problem type
status	true	integer (int32)	The HTTP status code

traceId	true	string	Internal trace ID for diagnostics
errors	true	object	Provides more details about errors that occurred, which can be used for visual display
data	true	object	Provides additional information for programmatic use

## ExportResponse\_Of\_Payroll.V2.PayrollActivityCodes.Pa...

Represents export API response.

Name	Required	Type	Description
hasMore	true	boolean	Indicates whether the export operation has reached its log limit. If true, there is more to export, and the consumer should make another request right away. If false, a new continuation token should be provided in the next request, which means there is no more data to export, and the consumer should wait for some time (usually a few minutes) before making another request.
continueFrom	true	string	Continuation token from the previous export operation. If the export operation should be used in a new request, this token should be used in the "continueFrom" parameter of the request.
data	true	<a href="#">Payroll.V2.PayrollActivityCodes</a>	The collection of export data. The data is usually sorted chronologically based on modification time.

## Payroll.V2.PayrollActivityCodes.PayrollActivityCodeExp...

Name	Required	Type	Description
------	----------	------	-------------

id	true	integer (int64)	ID of the payroll ac
name	true	string	Name of the payro
code	true	string	Code of the payroll
earningCateg...	true	One of: <a href="#">Payroll.V2.PayrollEa...</a>	Earning category of activity code
createdOn	true	string (date-time)	Date/time (on UTC) payroll activity cod
modifiedOn	true	string (date-time)	Date/time (on UTC) payroll activity cod
active	true	boolean	Indicates whether t activity code is acti

## Payroll.V2.PayrollEarningCategory

Type	Values
string	Timesheet , Commission , Reimbursement
